Microsoft Student Community Guidelines

Community guidelines

Welcome, we're glad you're here!

This is the official Microsoft community for students and recent grads. University, college, community college, grad school, or whatever you call it, you belong here! Recent grads are welcome too.

This is your space to learn new skills, find opportunities for Microsoft events, swap advice, and show what you can do with tech. A few simple guidelines to keep it helpful, safe, and focused for everyone. When you join, you're agreeing to follow these guidelines along with LinkedIn's Professional Community Policies.

What makes this community great

- Asking questions about skills, careers, Microsoft tech, events, and credentials
- Sharing advice and guidance that help other students
- Posting articles or ideas with your own take, plus a question to get people talking
- Showing off projects, credentials, and wins

Look out for each other

We want everyone to feel safe here, so we ask you:

- **Be kind.** Disagree with ideas, not people. Bullying, harassment, and hate have no place here.
- **Keep personal info private.** Please don't share contact details or private information, yours or anyone else's.
- **Stay scam aware.** Fake job offers; money requests, and suspicious links will be removed right away.
- **Know that you're in control of your messages.** LinkedIn lets members message each other, but joining this group doesn't give anyone permission to send you unwanted recruiting, sales or personal requests. If a message feels off, block and report the sender on LinkedIn, and give us a heads-up.

Good to know: Microsoft will never message you asking for money, passwords, personal information, or exam vouchers.

Keep it real

- **Be you.** Use your real identity, and please don't pose as Microsoft, its employees, or other members. Only community admins speak on behalf of Microsoft here.

Microsoft

- **Share your own work.** Post what's yours, and give credit when you build on others' work, including AI tools.
- **Protect the value of credentials.** Sharing or asking for exam questions, answers or "dumps" isn't allowed. It protects the credentials you work hard to earn.

Keep it focused

This community is all about learning, skills, and careers, so:

- **No spam or selling.** Sharing your project is welcome; promoting paid services, ads or affiliate links isn't. Please no selling, or trading vouchers, codes, or prizes.
- **No outside recruiting**. Opportunities in this group are shared by Microsoft admins, so please don't post jobs or "DM me for opportunities" messages.
- **Use the tools you love.** Feel free to mention the tools you use, like "I built this with Python and Azure." Posts that promote or compare other companies' products aren't the right fit here.
- **Leave hot topics at the door.** To keep this space focused on learning, we don't host debates on politics, current events, or company news.
- **Ask about responsible AI.** Questions about building AI responsibly and ethically are always welcome!

How posts are reviewed

A Microsoft admin reviews posts and comments daily, ensuring topics in the community stay on track. We look for posts and comments that are:

1. On topic: skills, learning, careers, or student life with tech
2. Helpful: adds value for other students
3. Safe and respectful: follows these guidelines

If something goes wrong

Most of the time, a friendly reminder is all it takes:

- First time: we'll remove the post or comment and send a reminder
- Second time: you may be paused from posting for a while
- Third time: you'll be removed from the group

To keep everyone safe, scams, harassment or hate, exam cheating, impersonation and sharing others' personal information are removed right away, and the member may be removed from the group.

Admins may remove content that doesn't fit the spirit of the community, even if it isn't listed here.

See something? Let us know

Use LinkedIn's report option on any post, comment or message that doesn't feel right, and give the admins a heads-up. Thanks for helping keep this community a great place to learn!
