PROGRAM REGISTRATION: WHAT TO DO NEXT

You're registered. Here's what you need to know as you work toward becoming a Student Ambassador.

- Check your Learn Username so your Microsoft credential and registration activity can be tracked correctly.
- Choose the Community Influencer or Community Skiller path and complete both requirements for the path.

- Check your weekly reporting email to track your progress toward completing the path.
- Complete both requirements for a path to be eligible for an onboarding invitation, sent in January, April, July, and October.
- Not ready for the next onboarding invitation? Your qualifying activity carries forward, so you do not need to register again or repeat it.

STEP 1: CHECK YOUR LEARN USERNAME

Make sure the Learn Username you entered when you registered matches your username on Microsoft Learn. We use it to track your Microsoft Certification or Microsoft Applied Skills credential and, if you choose the Community Skiller path, your Learn Plan activity.

STEP 2: CHOOSE YOUR PATH

Pick the path that best matches your interests, skills, and how you want to contribute. You can work on both paths, but you only need to complete one. If you work on both, you'll be considered based on the path you complete first.

Community Influencer

Community Influencers share Microsoft skilling content and grow an audience around useful learning opportunities. Complete both requirements:

- Reach 250 Preferred Visitors through eligible Microsoft content you share.
- Earn a Microsoft Certification or Microsoft Applied Skills credential within the 12 months before onboarding.

Community Skiller

Community Skillers host Microsoft Learn Plans and help others build Microsoft technology skills. Complete both requirements:

- Reach 1,000 net-new modules completed through the Learn Plans you host.
- Earn a Microsoft Certification or Microsoft Applied Skills credential within the 12 months before onboarding.

STEP 3: COMPLETE YOUR PATH REQUIREMENTS

Follow the instructions on your path page so your activity is eligible, tracked correctly, and counted toward your progress.

- **Community Influencer:** Share Microsoft skilling content
- **Community Skiller:** Host Microsoft Learn Plans

STEP 4: CHECK YOUR PROGRESS

You can check your progress:

- **Reporting email:** Sent weekly on Saturday or Sunday, Pacific Time.

When will my progress appear?

Progress is not updated in real time. Activity from the 48 hours before weekly reporting begins may not appear until the following week. Once reporting begins, it can take 24-48 hours to finish sending all reporting emails. You won't receive your first reporting email until activity is detected.

How do I know my activity is counting?

Your activity is confirmed when it appears in your reporting email. Activity shown in other tools or reports does not automatically count. Only eligible activity that meets your path requirements counts toward your progress.

STEP 5: WATCH FOR YOUR ONBOARDING INVITATION

Registered Members who complete both requirements for a path are eligible to receive an invitation to onboard as a Microsoft Student Ambassador. Invitations are sent in January, April, July, and October.

If you are not eligible for the next cohort, your qualifying activity carries forward. You do not need to register again or repeat it.

When you receive an invitation, follow the instructions in the email to complete onboarding. You become a Microsoft Student Ambassador after you successfully onboard.

FOLLOW THE PROGRAM RULES

Keep your activity authentic. Do not spam, use scripts, or engage in other behavior that violates the Microsoft Services Agreement or other terms you agreed to. Microsoft may ask you to validate your path activity.

GET CONNECTED

Meet other students, ask questions, learn about Microsoft technology and AI, and keep up with student activities, events, and opportunities. Joining is optional and is not required to become a Student Ambassador.

- **Discord:** Join the Microsoft Student Community server on Discord.
- **LinkedIn:** Join the Microsoft Student Ambassadors group on LinkedIn.

NEED SUPPORT

Have a question about the Student Ambassadors program after reviewing this handbook? Email SA-Help@microsoft.com. To help us help you:

- Use a short, clear subject line and put the details in the email body.
- Include what you're trying to do, what happened, any error messages, and what you've already tried.
- Send screenshots or a screen recording if you can. Make sure to redact your private information.

LEAVING THE PROGRAM

No longer want to work toward becoming a Student Ambassador? You can delete your registration at any time. Deleting your registration does not affect your Discord or Linkedln membership.

- Go to StudentAmbassadors.com and sign in with the account you used to register.
- Select your profile icon, then My Account, Privacy, and Delete Data.
- Enter your name as shown on your account, then select Delete My Data.

COMMUNITY INFLUENCER: SHARE MICROSOFT SKILLING CONTENT

Build engagement around Microsoft skilling by sharing eligible content with an audience that is genuinely interested in it. Complete both requirements to be eligible for an onboarding invitation.

Your goal

- Reach 250 Preferred Visitors through eligible Microsoft content you share.
- Earn a Microsoft Certification or Microsoft Applied Skills credential within the 12 months before onboarding.

BEFORE YOU START

Check your Learn Username

Make sure the Learn Username in your registration matches your username on Microsoft Learn. We use it to track your credential.

Find your Student Ambassadors Contributor ID

We use this ID to track activity generated through the Learn Plans you host.

- Sent by email 3-5 days after you register. Check your spam folder if you cannot find it.
- Format: ?wt.mc_id=studentamb_######
- It stays the same while you are a Registered Member.

Do not use the Learn Contributor ID shown under Settings in your Learn profile. Use your Student Ambassadors Contributor ID.

STEP 1: CHOOSE ELIGIBLE MICROSOFT CONTENT

Start with the Microsoft content you want to share. For your activity to count, the URL must include an eligible domain or path from the list below. A domain is the main website address. A path comes after the domain and points to a specific page or section.

Example:

- **URL:** https://www.example.com/blog/articles/how-to-code.html
- **Domain:** www.example.com
- **Path:** /blog/articles/how-to-code.html

How eligibility works

- If a domain is listed, any page on that domain counts.
- If a path is listed, that path and any pages under it count.
- If the domain or path is not listed, it does not count.
- Learn Plans do not count toward Preferred Visitors, even when the URL uses an eligible domain or path.
- Use the direct Microsoft URL. Do not use shortened URLs or links that redirect through another website.

Eligible Microsoft URLs

- azure.microsoft.com
- blog.fabric.microsoft.com
- code.visualstudio.com
- community.fabric.microsoft.com
- community.powerplatform.com
- copilot.microsoft.com
- developer.microsoft.com
- devblogs.microsoft.com
- dotnet.microsoft.com
- events.microsoft.com
- imaginecup.microsoft.com
- learn.microsoft.com
- microsoft.com/insidetrack
- microsoft.com/microsoft-365-copilot
- microsoft.com/microsoft-cloud/blog
- microsoft.com/microsoft-copilot/for-individuals
- microsoft.com/microsoft-fabric
- microsoft.com/power-platform
- microsoft.com/startups
- powerbi.microsoft.com
- reactor.microsoft.com
- studentambassadors.microsoft.com
- techcommunity.microsoft.com

STEP 2: ADD YOUR CONTRIBUTOR ID TO THE URL

- Copy the direct URL for the eligible Microsoft content.
- Add your Student Ambassadors Contributor ID to the end.
- Share the updated URL with your audience.

Check the URL before adding your ID:

- No question mark in the URL? Add your ID beginning with ?
- Question mark already in the URL? Add your ID beginning with &

Example 1: The URL does not contain a question mark

Start with:
https://azure.microsoft.com/free

Add:
?wt.mc_id=studentamb_######

Share:
https://azure.microsoft.com/free?wt.mc_id=studentamb_######

Example 2: The URL already contains a question mark

Start with:
https://signup.azure.com/studentverification?offerType=1

Add:
&wt.mc_id=studentamb_######

Share:
https://signup.azure.com/studentverification?offerType=1&wt.mc_id=studentamb_######

STEP 3: SHARE WITH THE RIGHT AUDIENCE

Think about who would benefit from the content and share it where it is relevant. Give your audience context about what you are sharing and why they may want to check it out. Do not ask people to click links simply to increase your numbers.

What counts toward your 250

Only visitors who meet the Preferred Visitor criteria count. The total clicks, views, or visitors shown in other reports or platforms may be higher than your Preferred Visitor count.

The exact Preferred Visitor formula is private. Instead of chasing clicks, focus on growing your audience, creating useful engagement, and making real connections.

Example

Maria finds a Microsoft Tech Community post about a certification course.

- Supports the goal: She adds her Student Ambassadors Contributor ID, shares the post on LinkedIn with people interested in certifications, and explains why it is useful.
- Does not support the goal: She drops the link into a busy WhatsApp group chat and asks everyone to click it just to generate clicks. The link quickly gets buried as new messages come in.

CHECK YOUR PROGRESS

Your activity is confirmed when it appears in your weekly reporting email. It is sent each Saturday or Sunday, Pacific Time, with your latest count.

Keep going until your reported Preferred Visitors count reaches 250. Likes, clicks, views, or visitors shown in social media reports do not automatically count as Preferred Visitors.

If your count looks wrong

Progress is not updated in real time. If your count is still lower than expected, check these common issues:

- **Clicks and views:** A click or view alone is not a Preferred Visitor.
- **Time on page:** Asking people to stay on a page for a certain amount of time does not increase your count.
- **Eligible URL:** The domain or microsoft.com path you shared is not on the eligible list.
- **Learn Plans:** Traffic from Learn Plans does not count toward Preferred Visitors.
- **Contributor ID:** Your Student Ambassadors Contributor ID is missing or incorrect. You may have used your Learn Contributor ID or used ? when the URL required &.
- **Activity:** The activity did not follow the Microsoft Services Agreement or other program rules, including rules against spamming or scripting.

COMMUNITY SKILLER: HOST MICROSOFT LEARN PLANS

Build Microsoft technology skills by hosting relevant Microsoft Learn Plans for people who are genuinely interested in learning. Complete both requirements to be eligible for an onboarding invitation.

Your goal

- Reach 1,000 net-new modules completed through the Microsoft Learn Plans you host.
- Earn a Microsoft Certification or Microsoft Applied Skills credential within the 12 months before onboarding.

BEFORE YOU START

Check your Learn Username

Make sure the Learn Username in your registration matches your username on Microsoft Learn. We use it to track your credential and Learn Plan activity.

Find your Student Ambassadors Contributor ID

We use this ID to track activity generated through the Learn Plans you host.

- Sent by email 3-5 days after you register. Check your spam folder if you cannot find it.
- Format: ?wt.mc_id=studentamb_######
- It stays the same while you are a Registered Member.

Do not use the Learn Contributor ID shown under Settings in your Learn profile. Use your Student Ambassadors Contributor ID.

STEP 1: CREATE A LEARN PLAN

Start with the Microsoft Learn content you want to include in your Plan. For your activity to count, the Plan must include only Microsoft Learn learning paths and modules.

To create a Plan:

- Read How to create and manage plans on Microsoft Learn.
- Go to your Learn Collections.
- Open an existing Collection or create a new one.
- Copy the Collection to a Plan.
- Enter the Plan details and create it.

STEP 2: ADD YOUR CONTRIBUTOR ID TO THE PLAN LINK

- Copy the Share link for your Plan.
- Add your Student Ambassadors Contributor ID to the end.
- Share the updated link with people who want to build those skills.

Check the Share link before adding your ID:

- No question mark in the link? Add your ID beginning with ?
- Question mark already in the link? Add your ID beginning with &

Example 1: The Share link does not contain a question mark

Start with:
https://learn.microsoft.com/plans/XXXXXXXXXXXXXX

Add:
?wt.mc_id=studentamb_######

Share:
https://learn.microsoft.com/plans/XXXXXXXXXXXXXX?wt.mc_id=studentamb_######

Example 2: The Share link already contains a question mark

Start with:
https://learn.microsoft.com/plans/XXXXXXXXXXXXXX?sharingId=XXXXXXXXXXXXXXXX

Add:
&wt.mc_id=studentamb_######

Share:
https://learn.microsoft.com/plans/XXXXXXXXXXXXXX?sharingId=XXXXXXXXXXXXXXXX&wt.mc_id=studentamb_#####
#

STEP 3: SHARE WITH THE RIGHT PARTICIPANTS

Think about who would benefit from the skills covered in your Plan and share it where it is relevant. Give potential participants context about what they will learn and why they may want to join. Do not ask people to join simply to increase your numbers.

Participants must select Start and agree to share their progress. If a participant selects Drop, their progress is removed from the Plan.

What counts toward your 1,000

Only net-new modules completed by Plan participants count. A net-new module is a module a participant completes for the first time after joining your Plan. The total modules completed shown in other reports or platforms may be higher than your net-new modules completed count.

Instead of focusing on total completions, focus on hosting relevant Learn Plans for people who are genuinely interested in the content and have not completed it before.

Example

Maria hosts a Learn Plan that includes the Describe Cloud Computing module. Henri joins the Plan.

- Henri completed the module before joining: 0 net-new modules completed.
- Henri completed the module after joining: 1 net-new module completed.

CHECK YOUR PROGRESS

Your activity is confirmed when it appears in your weekly reporting email. It is sent each Saturday or Sunday, Pacific Time, with your latest count.

Keep going until your reported net-new modules completed count reaches 1,000. Modules or completions shown in Learn Plan reports do not automatically count.

If your count looks wrong

Progress is not updated in real time. If your count is still lower than expected, check these common issues:

- **Plan content:** Your Plan included content other than learning paths or modules, or you updated the Plan after it was first saved.
- **Joining the Plan:** A participant did not select Start and agree to share their progress.
- **Leaving the Plan:** A participant selected Drop, which removed their progress.
- **Module completion:** A participant completed the module before joining, so it is not net-new.
- **Learn Username:** The Learn Username in your registration may be incorrect.
- **Activity:** The activity did not follow the Microsoft Services Agreement or other program rules, including rules against spamming or scripting.

LEARN USERNAME: MAKE SURE ITS RIGHT

The Learn Username in your registration must match your username on Microsoft Learn. If it does not match, your credentials and activity cannot be tracked.

- **If they match:** You're all set.
- **If they do not match:** You cannot edit your registration, but you can update your username on Microsoft Learn.

WHY THIS MATTERS

We use your Learn Username to track your Microsoft Certification or Microsoft Applied Skills credential. If you choose the Community Skiller path, we also use it to track your Learn Plan activity.

CHECK YOUR LEARN USERNAME

Step 1: Download your registration data

- Sign in to StudentAmbassadors.com with the account you used to register
- Select your profile icon, then My Account, Privacy, and Download Data.

Step 2: Find both usernames

- In your Download Data report, find the Learn Username you entered when you registered.
- Open your Learn profile settings on Microsoft Learn and find your current username.

Step 3: Compare them

- If they match, you're done. A full URL to your Learn profile in your registration also counts as a match.
- If they do not match, go to Step 4.

Step 4: Fix your username on Microsoft Learn

- In your Download Data report, find the First Name and Last Name you entered when you registered.
- Combine them in lowercase with no spaces. Example: John Smith becomes johnsmith.
- In your Learn profile settings, replace your current Learn Username with that result.

IMPORTANT

Your registration cannot be edited, and Student Ambassadors Support cannot change the Learn Username in your registration. Only you can fix the mismatch by updating your username on Microsoft Learn.

If you cannot or do not want to change it

If you are not comfortable changing your Learn Username, or if your lowercase first name and last name are not available on Microsoft Learn, you can delete your registration and register again.

- Go to StudentAmbassadors.com and sign in.
- Select your profile icon, then My Account, Privacy, and Delete Data.
- Register again using the correct Learn Username.

Before you do this, know that:

- Your current account and Student Ambassadors Contributor ID will be deleted.
- Your old activity will not carry over to your new account.
- Your new Contributor ID will be emailed to you 3-5 days after you register again.
